

# GEOTECH

Guzzler for Total Fluids

The Geotech Guzzler Total Fluids System is a compact total fluids pumping system designed for shallow well and sump applications with up to 25 ft. (7.6 m) of suction lift. The dual diaphragm pump will provide from 0-4 gpm (0-15 LPM) using from 2-6 cfm (.06-.17 cmm) of air, depending on the suction lift, pumping rate and total discharge head.

## FEATURES

- Pumps a wide viscosity range of fluids
- Variable speed pump matches well recharge rate
- Can be mounted in sumps – 12" (30cm) minimum
- Optional automatic level controls are provided to regulate the operation of the pump
- Robust PVC intake with stainless steel screen to pump nearly any fluid
- Tankfull Shut-Off Sensor
- Optional accessories:
  - Level Control Valve
  - Air Compressor
  - Well Caps
  - Tubing

**Standard Guzzler Total Fluids System Configuration**  
*Drawing not to scale*
